

TASK 3

Yasmin Briffa 5.1B

Evaluation & Testing

IPO Chart

Input	Process	Output
User clicks a navigation link	Loads that page	Chosen page opens accordingly
User clicks the dark/light theme toggle button	Page switches its colour	Page turns dark or light – not built
User types a word into the search bar	Loads search results	Search results shown
User scrolls down the page	Page goes down	More content is displayed
User clicks on Category page	Category page is loaded	Category page is shown
User clicks on a bird card	Loads page to that bird's info page	Bird's info page opens
User clicks "NatureNest" logo	Goes to homepage	Homepage loaded
User clicks on Gallery page	Loads gallery page	Gallery page displayed
User clicks on bird image	Loads the image	Image loaded
User scrolls through the photos	Page loads more photos	More photos of birds appear
User clicks on Contact us page	Loads Contact Us Page	Send message form loads
User enters their email address	Checks the details	Email address appears in the field
User enters their name	Checks the details	Name appears in the field
User types a message in the message field	Stores text input	Message content appears in the text box
User clicks send button	Validates and sends the form	'Confirmation' message received page loads
User enters username	Checks the details	Username appears in the field
User enters password	Checks the details	Masked password characters (••••) are displayed
User clicks Sign In/ Login button	Validates credentials	User is redirected to the homepage
User enters wrong password	Checks the details	Login unsuccessful with error message
User submits the form with empty fields	Checks for required fields	An error message to fill in the missing fields
User hovers over the bird info text card	Hover animation triggered	Card lifts up and a shadow appears
User hovers over the bird photo card	Hover animation triggered	Card lifts up and a shadow appears

User resizes browser window	System adjusts layout	Responsive layout displayed correctly
User resizes browser window to smaller screen	System adjusts layout	Navigation collapses into burger menu
User clicks burger menu icon	System should open mobile navigation menu	Burger menu border changes colour but menu does not open
User hovers over Sign In button	System applies the hover	Button changes colour
User hovers over Send button	System applies the hover	Button changes colour
User hovers over Login button	System applies the hover	Button changes colour
User hovers over navbar links (Logo, Category, Gallery, etc.)	System applies the hover	Navbar items change colour

Test Cases

Test Description	Expected Output	Actual Output	Pass/ Fail	Notes
Homepage				
Click "Category" in the navbar	Category page opens	Category page opens	P	
Click "Gallery" in the navbar	Gallery page opens	Gallery page opens	P	
Click "Contact Us" in the navbar	Contact us page opens	Contact us page opens	P	
Click "NatureNest" logo in the navbar	"NatureNest" directs to Homepage	"NatureNest" directs to Homepage	P	
Click "About Us" in the navbar	About us page opens	About us page opens	P	
Type in the search bar and click Search	Results matching the word are listed	No search performed	F	Search filter doesn't work
Scroll down the page	More content appears	More content appears	P	
Click Footer hyperlinks	Correct pages open	Correct pages open successfully	P	Footer links work
Click Social media links	Re-directs to social platform page	Re-directs to social platform page	P	
Category Page				
Click the Sanderling card	Sanderling page opens	Sanderling page opens	P	
Click the Black-winged Stilt card	Black Winged Stilt page opens	Black Winged Stilt page opens	P	

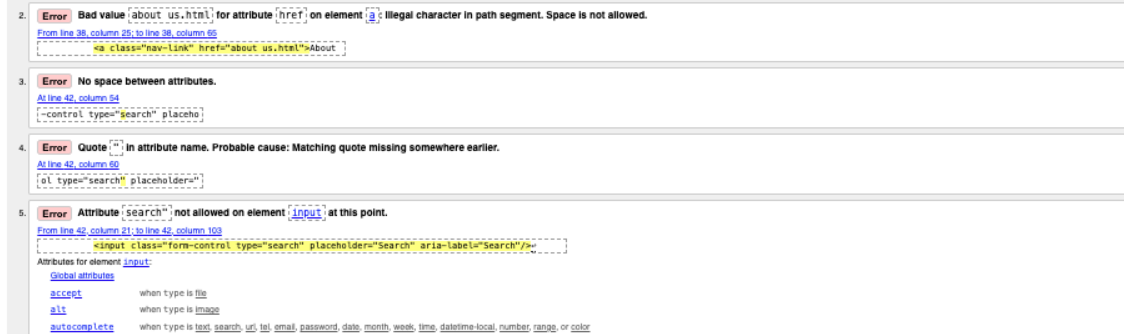

Click the Little Egret card	Little Egret page opens	Little Egret page opens	P	
Click the Common Greenshank card	Common Greenshank page opens	Common Greenshank page opens	P	
Click the Sandwich Tern card	Sandwich Tern page opens	Sandwich Tern page opens	P	
Click the Purple Heron card	Purple Heron page opens	Purple Heron page opens	P	
Hover over a bird card	Card lifts up slightly	Card lifts with shadow	P	
INFORMATION PAGE				
Bird name shown in card header	Correct bird name appears	All 6 pages show correct names	P	
Bird facts shown in list	6 facts are listed	All 6 pages have 6 facts each	P	
Bird photo appears	Photo loads next to facts	Photo loads next to facts	P	
Footer links work	Correct pages open	Correct pages open	P	Footer missing on bird info pages
Hover over info text card	Card elevates and shadow effect appear	Card lifts and shadow appears	P	
Hover over bird photo card	Card elevates and shadow effect appear	Card lifts and shadow appears	P	
GALLERY PAGE				
Gallery photos display in grid layout	12 bird photos appear in 3 columns	Grid layout loads correctly	P	
Hover on photo	Photo zooms in slightly	Photo scales up with border colour change	P	
Click on a photo	Larger view opens	Photo scales up with border change	F	No click functionality
CONTACT US PAGE				
Type name	Name field works	Name field works	P	
Type an email	Email field works	Email field works	P	
Type a message	Textarea works	Textarea works	P	
Click Send Message with all fields filled	Message is sent, confirmation shown	Form submits to Web3Forms	P	
Click Send Message with name empty	Error pop up to fill in name	"Please fill in this field" warning	P	

Click Send Message with email empty	Error pop up to fill in email	"Please fill in this field" warning	P	
Type invalid email format	Error pop up to invalid email	shows email format warning	P	
Submit with message box empty	Form should not send (message is required)	Form still sends without a message	F	Message field has no required
Hover over Send button	Button colour changes	Buttons change colour correctly	P	Hover state works
LOGIN SIDEBAR				
Hover over the right-side to open login sidebar	Login / Sign up sidebar slides in	Sidebar slides in on hover	P	
Type a username in the login field	Text appears in the username box	Text appears in the username box	P	
Type a password in the login field	Characters are hidden as dots	Characters are hidden as dots	P	
Click Login with details	User is logged in and taken to home page	Just redirects to homepage	P	
Click Login with empty fields	System should prevent login, ask for missing fields to be filled in. User should remain on login sidebar/page.	User is redirected to homepage even though no credentials were entered.	F	Error message for missing fields should be displayed
Hover over Login button	Button colour changes	Buttons change colour correctly	P	Hover state works
SIGN UP SIDEBAR				
Type email in the Sign Up field	Email appears in the box	Text appears in the box	P	
Type a new password in the Create Password field	Characters are hidden as dots	Characters are hidden as dots	P	
Click Sign Up button with completed fields	Validation checks and a new account is created	Just redirects to Homepage	P	
Click Sign Up button with empty fields	System should prevent login, ask for fields to be filled in. User should remain on login sidebar/page.	User is redirected to the homepage even though no sign-up information was entered.	F	Error message for missing fields
Hover over Sign Up button	Button colour changes	Buttons change colour correctly	P	Hover state works

Resize window and access burger menu	Burger menu remains accessible	Sidebar interferes with burger menu	F	Poor responsiveness
Close sidebar	Sidebar closes using control button	No close/toggle control available	F	Missing close button/function
Hover near right edge of screen	Sidebar remains hidden until activated	Sidebar slides in automatically	F	Sidebar trigger too sensitive
NAVBAR				
Hover over navigation buttons/links	Hover effect displayed	Navbar links/buttons change colour correctly	P	Hover state works
Resize browser window to mobile size	Web layout adjusts and burger menu appears	Layout adjusts and burger menu appears	P	Responsiveness works
Click burger menu icon	Burger navigation menu opens	Border colour changes but menu does not open	F	Burger menu functionality not working
FOOTER				
Resize browser window on footer	Footer content adjusts proportionally without overlap	Footer sections becomes over compressed but still visible	P	Small issue with the spacing
View footer on smaller screen	Text and links remain aligned and readable	Text and links appear too close together	F	Spacing issue
Click footer quick links	Correct pages open	Correct pages open	P	Navigation works
Click social media icons	Redirects to correct platform	Social media login pages open	P	Social media links work

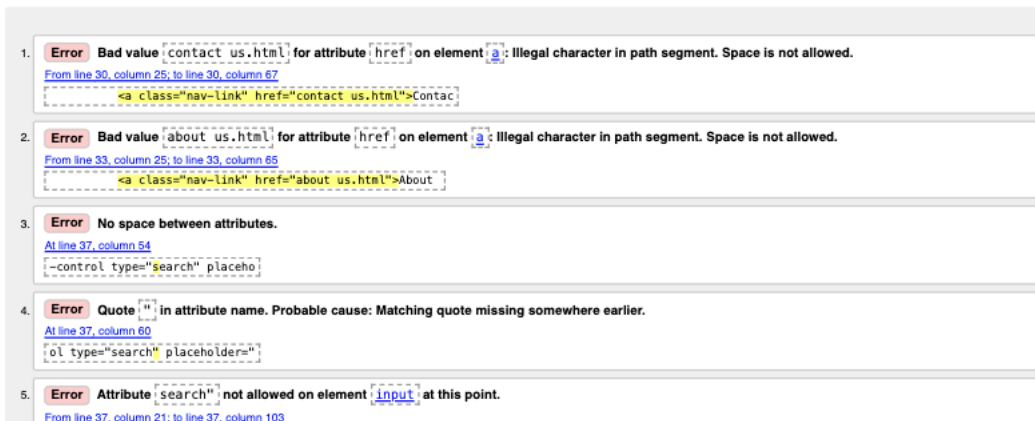

Code Validation:

Index.html

- Broken quote in the search bar causing multiple errors
- Button placed inside anchor tag in the login sidebar
- Bootstrap JS loaded in the wrong place

Gallery.html

- Spaces in all image file paths meaning images will not load on any other device.
- Most errors were the same image path error repeated for each photo

Category.html

- Error** Bad value 'contact us.html' for attribute 'href' on element 'a': Illegal character in path segment. Space is not allowed.
From line 31, column 25, to line 31, column 67
`<a class="nav-link" href="contact us.html">Contac</a>`
- Error** Bad value 'about us.html' for attribute 'href' on element 'a': Illegal character in path segment. Space is not allowed.
From line 34, column 25, to line 34, column 66
`<a class="nav-link" href="about us.html">About</a>`
- Error** No space between attributes.
At line 38, column 54
`--control type="search" placeho`
- Error** Quote (") in attribute name. Probable cause: Matching quote missing somewhere earlier.
At line 38, column 60
`[el type="search" placeholder="]`
- Error** Attribute 'search' not allowed on element 'input' at this point.
From line 38, column 21, to line 38, column 103
`<input class="form-control" type="search" placeholder="Search" aria-label="Search"/>`
Attributes for element 'input':

accept	when type is file
alt	when type is image
autocomplete	when type is text, search, url, tel, email, password, date, month, week, time, datetime-local, number, range, or color
autofocus	
checked	when type is checkbox or radio

- Spaces in image file paths for the bird card images

Contact us.html

- Error** Bad value 'contact us.html' for attribute 'href' on element 'a': Illegal character in path segment. Space is not allowed.
From line 32, column 25, to line 32, column 67
`<a class="nav-link" href="contact us.html">Contac</a>`
- Error** Bad value 'about us.html' for attribute 'href' on element 'a': Illegal character in path segment. Space is not allowed.
From line 35, column 25, to line 35, column 66
`<a class="nav-link" href="about us.html">About</a>`
- Error** No space between attributes.
At line 39, column 54
`--control type="search" placeho`
- Error** Quote (") in attribute name. Probable cause: Matching quote missing somewhere earlier.
At line 39, column 60
`[el type="search" placeholder="]`
- Error** Attribute 'search' not allowed on element 'input' at this point.
From line 39, column 21, to line 39, column 103
`<input class="form-control" type="search" placeholder="Search" aria-label="Search"/>`

- There were no new errors on this page. All of the errors were the same as the ones found on the homepage.

About us.html

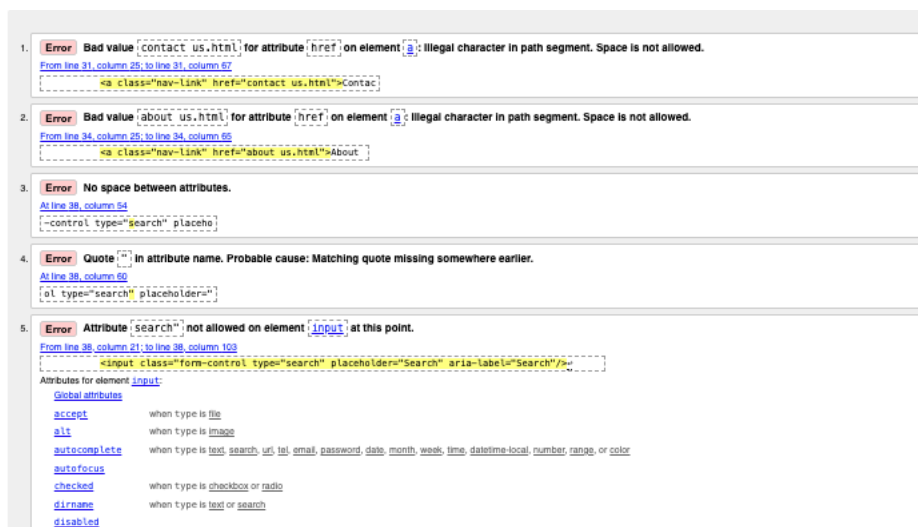

```
<li><a href="about us.html">About</a>
```

- Error** The element 'button' must not appear as a descendant of the 'a' element.
From line 102, column 30, to line 102, column 37
`[dex.html]><button>Login</button>`
- Error** The element 'button' must not appear as a descendant of the 'a' element.
From line 107, column 31, to line 107, column 38
`[ex.html]><button>Sign U</button>`
- Error** End tag for 'body' seen, but there were unclosed elements.
From line 110, column 1, to line 110, column 7
`</div></body></>`
- Error** Unclosed element 'div'.
From line 48, column 1, to line 48, column 5
`[utube]><div></div>`
- Warning** This document has heading elements but none of them has a computed heading level of 1.
From line 52, column 17, to line 52, column 20
`<h2>About`

- An unclosed div tag was found on line 48. This means a div tag was opened but not closed properly.
- The body tag was closed before all the other tags were closed, which means some parts of the code were left unfinished.

Bird information pages (Sanderling, Little Egret, Black Winged Stilt, Common Greenshank, Sandwich Tern and Purple Heron)

Black Winged Stilt.html

- The same repeated errors from the other pages were found on this page including the broken quote in the search bar and the button inside anchor tag.
- A space was found in the image file path for the bird photo, meaning the image will not load on any other computer.

The other bird information pages were also validated. They all contained the same repeated errors as the other pages including the broken quote in the search bar and the button inside anchor tag in the login sidebar. No new errors were found that had not already been seen on the other pages.

Warnings (2)

URI : TextArea	
17	-webkit-text-stroke is a vendor extension
29	-webkit-text-stroke is a vendor extension

Valid CSS information

The CSS file had only 1 error and 2 warnings. The error was that attr() was written with empty brackets, which is not allowed however this did not affect the website as the hover effect on the footer links still works correctly in the browser.

Suggestions:

Missing planned features

- Interactive map page was planned but not built. It should show Malta with clickable bird locations.
- Dark/light mode toggle is missing. A navbar button should switch themes for better usability.
- Favourites system was not built. A heart button should let users save birds to view later (useful for Maya).
- Back-to-top button is missing. It should appear when scrolling and return users to the top.
- Sign in/sign up system does not work properly. It needs validation and proper account login/creation instead of redirecting to homepage.

Bugs found in testing

- Search bar does not work. Filter birds option could be added more clearly. (useful for Alex)

- Gallery images do nothing when clicked. A lightbox could be implemented to show the bird's name and description for example or hover text should show bird names or short description (useful for Maya and Sarah).
- Burger menu does not work on mobile or desktop and needs fixing.
- Login sidebar appears too easily on hover. It should include a close button.
- Contact form message field is not required and should be fixed.
- Footer is missing from bird pages and should be added for navigation.

Style guide improvements

- Dopestyle font was not loaded correctly and should be fixed for the logo.
- Profile avatar icon could be added to open the login sidebar instead of hover (hard to discover).

Content improvements (similar websites)

- Add migration maps on bird pages showing where birds are found and travel from.
- Add fact boxes (size, weight, wingspan, diet, lifespan) for quick information (helps Alex).
- Add seasonal guides showing best months to see each bird.
- Add conservation status labels (endangered, vulnerable, etc.).
- Add more bird species (e.g. Peregrine Falcon, Blue Rock Thrush) to improve content depth.

Search and filtering improvements

- Add filters by bird type (water, land, migratory) instead of only scrolling.
- Add advanced search by habitat, colour, or size for easier browsing.

Community features (similar websites)

- Add sighting reports where users submit bird sightings and photos.
- Add comments section on bird pages for user interaction (good for Sarah).

Accessibility and usability

- Add Maltese language option to reach wider audience.
- Add print-friendly version of bird pages for birdwatching use.
- Add image captions and proper credits to improve professionalism and accessibility.

Extra features (similar websites)

- Add merchandise page (t-shirts, mugs, posters) to support funding.
- Add events page for birdwatching activities in Malta (useful for Sarah).
- Add blog/news page for sightings and conservation updates (helps engagement and SEO).

New ideas

- Bird sound player on each bird page (more interactive for Sarah).
- Quiz feature to test knowledge (good for Alex).
- Bird of the day feature on homepage to encourage return visits.

Evaluation:

Overall, the NatureNest website has a good visual design and mostly follows the style guide from the planning document. The colour scheme matches the planned design, including the olive green background, dark khaki navbar and peach glow buttons. The hover effects on buttons, cards and images are also similar to what was planned. However, the Dopestyle logo font was never properly loaded, so the browser uses a default font instead. The toast notifications and feedback messages mentioned in the style guide were also never added to the forms.

Looking at the wireframes, most pages follow the planned layouts well. The homepage, category page, contact page and gallery page are all close to their original wireframes. There is also no interaction when clicking or hovering over gallery photos.

The website only partly meets the needs of the target audience. Alex needed a working search feature and quick fact boxes, but both are missing. Sarah needed a mobile friendly website, but the site does not work properly on smaller screens. Maya needed clear images and organised galleries, but clicking on gallery photos does nothing and no extra information is shown.

Compared to similar bird websites like BirdLife Malta, NatureNest is missing some interesting features such as a news/blog section, events page, community sighting tool and merchandise page. These features would make the website more interactive and encourage users to return more often.

Several planned features were also never created, including the interactive map page, dark/light mode toggle, favourites feature and back-to-top button. The search bar also does not work. The login sidebar is difficult to use because it opens too easily, has no close button and causes problems with the burger menu on mobile devices.

The responsiveness of the website could also be improved. When resizing the browser window on desktop, the footer sections become too small and overlap each other. The images on the gallery and bird information pages are also too large and do not resize properly on smaller screens.

The accessibility of the website also needs improvement. Many images are missing alt text, meaning screen reader users cannot understand the images. The website also does not have a main heading on most pages, which makes it difficult for screen readers to understand what each page is about. This can make the website harder to use for visually impaired users. These small issues make the website harder to use for people with disabilities. Improving accessibility would make the website usable for a wider range of users.

In conclusion, the website looks visually appealing but is missing many planned features and functions. Overall, it is a beginner friendly website that shows good effort and a strong visual foundation. If the bugs were fixed, responsiveness improved, accessibility issues solved and missing features added, the website would better meet the needs of all three user personas and more closely match the original planning document.
